Description:

About the projects: we are building LLM evaluation and training datasets to train LLM to work on realistic software engineering problems. One of our approaches, in this project, is to build verifiable SWE tasks based on public repository histories in a synthetic approach with human-in-the-loop; while expanding the dataset coverage to different types of tasks in terms of programming language, difficulty level, and etc. About the Role: We are looking for experienced software engineers (tech lead ...

39. AI Benchmark Engineer (Data Analysis)

Company: Turing

Category: pro

Location: Kolkata, West Bengal

Remote/WFH: No

Salary: Not disclosed
